PROJECTS

I'm currently in charge of developing backend for Akateeminen Kynäriliiga. You can find the repositories at my GitHub (<https://github.com/Akzuu>)

I have also been goofing around with Raspberry Pi. I'm currently running a media server at my home but I'm also planning to create a small dropbox like cloud storage for my personal use when I find the time.

HOBBIES

Scuba Diving
Hiking
Photography
Cycling
Kyykkä
Movies, series & videogames

EMPLOYMENT HISTORY

SOFTWARE DEVELOPER TRAINEE

Plugit Finland Oy | May 2019 - Aug 2019

- I was part of a small backend development team
- I learned how to create microservices with Node.js and how to run them with Kubernetes
- I developed an automatic car charger tester for internal use and then moved into client projects

DRIVER

Time of Music Festival | Summer 2017

- The festival lasted one week and during that intense time I was part of the logistics team. I drove artists and other staff members around the city and I also did some night shifts
- I learned about working with people from different backgrounds

EDUCATION

MASTER OF SCIENCE IN INFORMATION TECHNOLOGY

Tampere University | Expected Grad. May 2023

- I graduated as a bachelor of science during the fall of 2020
- My bachelor's thesis focused on serverless architecture
- I'm currently studying towards my masters degree

YLIOPIILAS

Viitasaaren Lukio | Grad. Jun 2016

ACTIVITY

TAMPEREEN AKATEEMINEN KYKKASEURA

Member of Board 2019, Official 2020-2021

I have helped organizing Kyykkäliiga and various other small Kyykkä tournaments. I have also taught this noble sport to many first year students.

TR3 GAMERS

Akateeminen Kynäriliiga IV & V 2019-2020

I have organized 64 team online CS:GO tournament and one day offline finals in 2019 and 74 team online CS:GO tournament in 2020.
